01 Profile

Senior content designer with 10+ years across **games and virtual worlds**. My work also spans AI-enabled systems and health, plus enterprise software and teaching. Recent projects combine product strategy with prototypes and scripts. I look for the language decisions a system can measure or enforce, then keep the remaining judgment with people. At Meta Reality Labs, I led mobile and spatial product work. I also led social UX, just-in-time education, and experimentation. From 2025 to 2026, I led company-wide AI adoption for content design.

02 Experience

Senior Content Designer · [Horizon, Experimentation + AI](#) NOV 2022 → MAY 2026
META · REALITY LABS + CROSS-ORG

- **Led AI adoption for content design (2025–2026).** Created Verso, Meta's first domain-specific AI content designer, and the technical platform behind it. The system routed requests by product and retrieved structured evidence. It loaded reusable skills and ran executable content checks. Within six months it expanded from Horizon to broad use across Meta.
- **Brought content designers into agentic workflows** through workshops and office hours. I taught VS Code and local agent setup, then helped designers author reusable [SKILL.md](#) files and deterministic scripts for rules markdown guidance could not reliably enforce.
- **Established Reality Labs' first content experimentation initiative** and led content designers across its major product areas. Represented Reality Labs with company-wide experimentation leads. I built workshops and practical tools for writing hypotheses and tracking tests, then helped teams share what they learned.
- **Helped turn Meta Horizon's phone app from a headset utility into a repeat-use mobile product.** I led content from early journeys and a strategy one-pager for Mark Zuckerberg through launch experiments. The resulting loop helped people discover worlds and make progress toward rewards, improving repeat use and retention.
- **Defined the strategy and jobs to be done for Horizon portals.** Built the metadata and progressive-disclosure framework for navigating between virtual worlds. The system earned VP alignment and appeared in the Meta Connect 2024 keynote.
- **Designed social play across virtual reality and mobile.** The work covered parties and calling, plus group launch and public chat. Co-watch and travel were also part of the system. Experiments increased time spent playing together and overall engagement.
- **Replaced billboard-style instruction with just-in-time spatial education.** Controllers and spatial cues taught one thing when it became relevant, improving first-world visits and retention and earning adoption by the Home team.

03 Earlier experience

OCT 2021 → OCT 2022	Lead UX Writer · Digbi Health Led product content for a precision-health startup. Turned microbiome science and clinical data into personalized journeys from onboarding through behavior change. Genetics shaped the experience too. Members could use it without a clinician beside them.
APR → OCT 2021	UX Writer · 8×8 Made enterprise voice and video understandable, along with chat and contact-center tools. I also clarified phone administration for the business owners responsible for setting it up.
2014 → 2021	Writing & Communication Instructor · ALU, WVU + VCU Taught composition and poetry workshops to university writers, then trained Army officers to turn complex, high-stakes information into clear, direct language.
